

Local AI for High-Risk Workflows.

Stop leaking proprietary data to the cloud. We deploy localized, air-gapped AI environments that automate RFIs, submittals, and complex documentation on your own hardware.

OPERATIONAL ARCHITECTURE

THE SOLUTION

Construction RFI Assistant

Instant Context: Digest 1,000+ page project manuals in seconds.

Zero Leakage: 100% on-premise or private-cloud processing.

Logic-Aware: Understands the difference between a material substitution and a design change.

THE TACTICDEV PILLARS

Sovereign Infrastructure

Building "Local Hubs" using Llama 3 or Mistral—no API fees, no data harvesting.

FOSS-First Stack

Leveraging open-source power to eliminate the "SaaS Tax" and ensure you own the code forever.

CASE STUDY: HIGH-RISK AUTOMATION

Project: Construction Document Processing.

High-Velocity Deployment: From discovery to a live local node in 14 days or less.
